q0hh                    NUMBER OF ADULTS IN HOUSEHOLD

Because this is a scientific study, we need to select one adult member of the household to interview. To do this, please tell me how many adults, that is persons 18 years or older, live there.

How many adults, 18 years or older, live there?

( We need to know how many adults 18 years and older live in each household so that we can randomly select a respondent. This is necessary to scientifically conduct this study. )

rvDM11                    There has been much talk recently about changing the  
Social

There has been much talk recently about changing the Social Security retirement system (the federal program providing benefits to retired workers), so how the system will look in the future is uncertain.

With this in mind, I would like you to think about what kind of Social Security retirement benefits will be available when YOU are older. Please think ahead to when you are about to turn 70 years old and suppose that you are not working at that time.
