

Dear Dr. Viceisza,

We are sorry to hear that your email was targeted for spam. That is unfortunately a common occurrence these days.

We do not at the moment have the ability to display email as an image as you suggest. What we can do is add you to the list of users whose contact info will not be visible to the general public (including crawling spam harvesters) but only to logged-in NBER Affiliates and staff. Would you like us to do that?

Thank you,

- Alex Aminoff
