

## Some Implications of Machine Learning for Research in Economics

Mara Lederman

### Your Assignment

"Review the program for this year's conference as well as the programs from the last 2 years. Search the NBER website for working papers on machine learning. Try to think about the ways in which the emergence of machine learning is impacting research in economics. Put simply, (how) has machine learning changed the research questions and opportunities available to you, as a doctoral student in 2021, relative to the ones that were available to a doctoral student in 2001?"
